PROFESSIONAL SUMMARY

B.Tech graduate in Artificial Intelligence & Data Engineering with hands-on experience in Machine Learning, Agentic AI, RAG, and backend development. Built ML and AI solutions for logistics and supply chain, with experience in ETL, predictive modeling, hybrid retrieval, REST APIs, and Docker.

TECHNICAL SKILLS

Languages & Frameworks: Python, SQL, JavaScript, FastAPI, Flask, REST APIs

Machine Learning: Scikit-learn, PyTorch, Pandas, NumPy, TensorFlow, NLP, Feature Engineering, Model Training, Model Evaluation, Tensorflow, Computer Vision

Generative AI: RAG, Transformers, Hugging Face, Embeddings, Vector Search, LangChain, LangGraph, LLM APIs, Prompt Engineering, Agentic AI, Tool Calling, MCP

Databases & Retrieval: PostgreSQL, MySQL, Neo4j, pgvector, FAISS, ChromaDB, Redis

Data Engineering: ETL, EDA, Data Preprocessing, Data Analysis, Statistics, Power BI, Tableau

Engineering: Docker, AWS, Git/GitHub, CI/CD, OOPS, DSA

EXPERIENCE

Associate Data Scientist Technical Trainee

Mar 2026 – Jun 2026

Relanto.AI

- Developed an end-to-end logistics and inventory AI solution, performing ETL on a large-scale dataset and integrating PostgreSQL, Neo4j, and vector databases.
- Built and evaluated ML models for ETA prediction, route prediction, and demand forecasting, integrating ML outputs into downstream AI workflows.
- Designed LangGraph-orchestrated agentic workflows with multilingual chatbots.

Data Analytics Intern

Feb 2024 – Jun 2024

FutureNSE

- Processed and analyzed structured datasets by performing ETL, exploratory data analysis (EDA), and visualization using Python, Pandas, MySQL, Tableau, and Power BI.
- Built and evaluated machine learning models including Linear Regression, Logistic Regression, Decision Trees, Random Forest, and XGBoost for predictive analytics.

PROJECTS

FinSight – Agentic Financial RAG System | *Python, FastAPI, PostgreSQL, LangGraph*

- Built an agentic financial RAG platform supporting PDF, DOCX, and TXT with hybrid retrieval using pgvector, PostgreSQL FTS, and RRF.
- Designed LangGraph agents for query rewriting, multi-step execution, deterministic calculations, and evidence-based citations.
- Implemented conversation memory, PII masking, guardrails, and prompt-injection detection.

TripPilot – Agentic Travel Concierge | *Python, Groq, SQLite, Open-Meteo*

- Built a tool-calling travel agent with ReAct orchestration, controlled tool execution, deterministic budget calculation, human-in-the-loop clarification, and post-hoc guardrails.

Credit Risk Prediction | *Python, XGBoost, Scikit-learn, FastAPI, Docker*

- Built and compared 3 models to predict 90+ day credit delinquency, addressing 6.7% class imbalance through stratified splitting and imbalance-aware training.
- Performed leakage-safe preprocessing, feature engineering, and outlier winsorization; deployed the model as a Dockerized FastAPI REST API on Render with Swagger.

Live Crypto Dashboard | *Python, FastAPI, Redis, Streamlit, Docker*

- Built a real-time cryptocurrency analytics platform using Binance WebSocket, Redis Pub/Sub, FastAPI, and Streamlit with an event-driven ETL pipeline.
- Engineered rolling metrics and REST/WebSocket APIs in a Dockerized microservice architecture.

EDUCATION

Jain (Deemed-to-be University)

Kanakapura, Bangalore

B.Tech in Artificial Intelligence & Data Engineering CGPA: 8.7

2022 – 2026
